TEAK OUTDOOR FURNITURE  
VOL. II

# Founded in Barcelona since 1999.

OTAZEN was founded in Barcelona since 1999, on the shores of the Mediterranean. But we were raised in Java, with the Indian Ocean on our horizon. With almost 25 years of experience in manufacturing furniture for the world's best brands and hotels, we wanted to pay tribute to these two great seas that have influenced our path enormously.

The collections we present in this catalog are inspired by our beloved Mediterranean, but with a dash of the rich traditions of Asia. We wanted to pay a humble tribute to this fusion with designs that combine the best of the Mediterranean style with Asian touches, that capture the comfort of indoors and take it outdoors, and that incorporate the beauty of home furniture but give it the durability for use in the hospitality industry.

We hope you enjoy these teak outdoor collections as much as we have enjoyed designing and developing them. Please join us in this new chapter of our history.

**Welcome to Otazen.**

# Teak, the essence that sets us apart.

CRAFTSMANSHIP  
TECHNOLOGY  
QUALITY

In the dynamic scene of the outdoor furniture industry, Otazen stands out as a world-renowned company, consolidating its position as a leading manufacturer of teak furniture. Based in Indonesia, the company has thrived on an exceptional combination of factors that set it apart globally.

One of Otazen's undeniable advantages lies in its privileged geographical location. Indonesia is home to the largest teak plantations in the world, giving the company direct access to the best raw material available. Teak, renowned for its natural beauty and high strength, is carefully selected and expertly treated to ensure the highest quality in all products.

Specifically, the quality of Otazen furniture is a direct consequence of its dedication to the highest production standards. The methods and technologies used in the manufacturing process are a combination of tradition and modernity. The experience of specialised craftsmen, with years of knowledge and skill, is fused with the implementation of advanced techniques, resulting in teak furniture pieces of exceptional quality.

## SUSTAINABLE

Today, Otazen works closely with communities and environmental organisations to ensure an ecosystem-friendly harvesting and replanting process. Therefore, teak is a sustainable wood, coming from responsibly managed plantations.

With regard to the natural properties of this material, its resistance to climate, humidity and insects stands out, making it a long-lasting option. It also has a great capacity to resist deformation and deterioration, essential qualities for outdoor furniture.

The care of teak furniture is simple. However, Otazen offers maintenance guidance to ensure that customers can enjoy the quality and functionality for many years to come.

**Otazen stands as the  
undisputed leader in teak  
furniture manufacturing  
worldwide.**

## RESISTANT

The combination of a strategic location, high-quality technologies, and expert craftsmanship ensures exceptional teak products. Furthermore, through a commitment to sustainability and environmental conservation, we contribute to the protection of natural resources. By choosing Otazen furniture, you choose excellence and lasting quality in outdoor furnishings.

La Mamba Studio

## ABOUT

In La Mamba we breathe design. We understand design from a harmonized and global perspective. Hand in hand with our client, we define the aesthetics, the functionality and the communication of each product, from a humanist and logical point of view that opens new horizons. We are specialized in product design. We bring functionality, sensitivity, serenity, balance and subtlety to every project, that we conceive and develop from beginning to end.

Pensi Design Studio

## ABOUT

The studio was founded in Barcelona in 1984 with a team focused on timeless design. They constantly seek a balance between poetry and realism, material and space, abstraction and emotion. The aim is to create as many sensations as possible with few resources, challenging the usual logic to see if it is possible to create something new. The outcome is not always predetermined. The best is yet to come.

BE HONEST.  
BE LEGAL.  
BE TEAK.

Otazen believes in the importance of preserving and protecting nature in its fullest sense. From the initial manufacture of our furniture to its final delivery to our customers, Otazen’s production cycle is based on an approach to creating durable and sustainable products that have as little impact on nature as possible.

We carefully select wood from controlled and certified plantations, avoiding waste and optimising its use to the maximum. In addition, we strive to reduce the use of plastics in our packaging, using alternative and sustainable materials such as paper and cardboard. We also prioritise local production to reduce carbon emissions associated with transport. Furthermore, our water-based paints contribute to minimising toxic substances released into the environment.

In short, Otazen designs products of high quality and resistance, reducing the need to replace them frequently and thus reducing the consumption of resources and the generation of waste. All this with the aim of promoting a responsible and nature-conscious lifestyle.

CERTIFICATIONS

# WOOD ORIGIN

As well as being important for the environment, wood is renowned in the furniture industry for its quality and durability. To create a sustainable production cycle, we have selected wood that comes exclusively from controlled plantations that follow strict reforestation procedures.

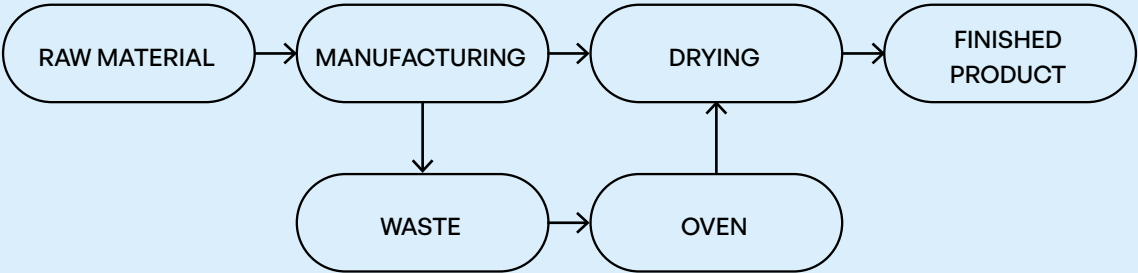

# REDUCING TOXIC SUBSTANCES

Another aspect of the sustainability of our production cycle is our choice of paints, which represent the color range of Otazen products. Our coatings do not contain PFAS chemicals; we use only water-based products with high sustainability standards. Thermosetting epoxy powders are used for painting to ensure the highest aesthetic standards without emitting volatile organic compounds (VOCs) into the atmosphere. This eliminates the use of toxic or environmentally hazardous substances.

# ZERO WASTE

Otazen’s production cycle is focused on becoming a sustainable company. To achieve this, we maximize resource utilization and reduce waste. A prominent aspect of our strategy is the utilization of all wood waste generated during our manufacturing process. These waste materials are utilized as fuel in our kilns, aiding in the drying of new teak components. This practice not only prevents the generation of unnecessary waste but also reduces our dependence on fossil fuels and contributes to a decrease in greenhouse gas emissions. Additionally, by reusing wood waste, we maximize resource efficiency and minimize the need for additional materials. At Otazen, we are committed to continually developing innovative and sustainable practices to preserve the environment and build a more sustainable future.

# ZERO PLASTIC PACKAGING

As part of our commitment to sustainability, we have made significant changes to our product packaging by completely eliminating the use of plastic and opting for paper and cardboard materials instead. This shift aligns with our zero single-use plastic campaign, where we strive to reduce plastic waste and its harmful environmental impact. By sourcing eco-friendly alternatives and collaborating with like-minded suppliers, we ensure that all our product packaging is plastic-free. We believe that by taking these measures, we not only fulfill our responsibility towards the environment but also inspire our customers to make more sustainable choices, contributing to the global efforts in reducing plastic pollution and creating a healthier planet for future generations.

# CERTIFICATIONS

It is this commitment that has earned us the FSC (Forest Stewardship Council) and V-Legal (Indonesian Legal Wood) accreditation. These certifications demonstrate our strong dedication not only to producing high quality and durable products, but also to protecting the environment.

V-Legal certification represents Otazen's vision to support the Indonesian government in forest management and the eradication of illegal logging and trade in Indonesia's forests.

Otazen also holds the FSC Chain of Custody certification, which proves that the product can be traced from an FSC certified forest all the way through to the end customer. Thanks to this traceability, we know which teak plantation the product comes from and the age of the trees, from sourcing to distribution.

**“THE FIRST  
RULE OF  
SUSTAINABILITY  
IS TO ALIGN  
WITH NATURAL  
FORCES, OR AT  
LEAST NOT TRY  
TO DEFY THEM.”**
